/:ideas/

I am a full-stack software developer with a strong design background. In my previous career as an architect, the process of designing skyscrapers trained me to break down complex problems into their constituent parts. No one could build the projects alone, it was always the result of collaborative effort. Due to that, I grew to be an excellent team player.

EXPERIENCE

Nov'17-March'18 Web Development Immersive General Assembly
O-Lingo
A Full-stack application with React on Rails which let users to translate languages.
Technologies: Ruby on Rails, React, Styled-Components, Microsoft Azure API, Google Map API
